The screenshot displays a web-based database management tool interface. At the top, the browser address bar shows the URL: `db=daftarmahasiswa&table=tabel_mahasiswa`. The interface header indicates the connection details: **Server: 127.0.0.1 » Database: daftarmahasiswa » Table: tabel_mahasiswa**. A toolbar contains icons for **Browse**, **Structure**, **SQL**, **Search**, **Insert**, **Export**, **Import**, and **Priv**.

A green status bar reports: **Showing rows 0 - 5 (6 total, Query took 0.0003 seconds.)**. Below this, the SQL query `SELECT * FROM `tabel_mahasiswa`` is displayed. A row of links includes **Profiling**, **Edit inline**, **Edit**, **Explain SQL**, **Create PHP code**, and **Refresh**.

Control options include a **Show all** checkbox, a **Number of rows** dropdown set to 25, a **Filter rows** search box with the placeholder "Search this table", and a **Sort by key** dropdown.

A section titled **+ Options** contains a table of student data. Each row has checkboxes for **Edit**, **Copy**, and **Delete** operations.
